Good morning. Thank you for giving us the opportunity to be here with you today.

We have submitted a large volume of written material to you, so I will not go through that now but would be happy to answer any questions you have about it.

The governor’s proposed budget is slightly less than the numbers contained in the adopted biennial budget.

The total reduction for the appropriation over the biennium to UConn (including UConn Health) is $110 million, which rises to $179 million with fringe. Historically, cuts to UConn’s state support including reductions, rescissions, and fund sweeps since 2010 are $125 million, and $164 million with fringe.

We know that when the legislature approves budgets that reduce funding for UConn, it’s because it is necessary to close deficits, not because most legislators believe cutting UConn is good public policy or good for the state.

I want to share two brief anecdotes that are tied directly to the value of our state appropriation.

I speak with legislators in small groups and one-on-one on a regular basis. One comment I’ve heard is that UConn doesn’t do enough to advertise how we are managing budget cuts. One legislator said: “We keep slashing UConn’s budget and the university seems fine. That invites more cuts.”

We have raised tuition, implemented tens of millions of dollars in reductions – including to every single academic unit – had workforce reductions, restricted hiring, and have stopped growing our enrollment. This means fewer classes, bigger classes, and less financial aid. It is not pretty.

But understanding this is key: our prospective students have many choices when it comes to which university they will attend. Right now UConn is a top choice for many of the best students who are graduating from high schools in every single Connecticut city and town. That was not always the case.

It is the case today because UConn aggressively recruits these students, has an excellent academic reputation, and is much more affordable for Connecticut residents than any of our competitors, thanks to in-state tuition and strong financial aid.

As leaders at the university, we must argue for investment in UConn and fight tooth and nail against major budget reductions. But if UConn were to create the public impression that it was in decline and were to focus relentlessly on the negative impact of these cuts, rather than on the great things we offer students, that would badly undermine our recruiting. It would have the effect of driving prospective students away, weakening the university as a whole.
It would be the equivalent of a business running ads saying it wasn’t as good as it used to be because of cutbacks.

The fact is that the university is working aggressively to maintain its academic strength and the quality of the student experience in the face of these significant cuts.

But to me, the story of UConn in recent years is not just about maintaining our quality, it is also about unfulfilled potential.

We spend 100% of our state appropriation on people. And faculty are our number one personnel cost.

I spoke with a Connecticut business leader the other day. He pointed out that big employers in the state like Electric Boat, Sikorsky, Pratt & Whitney, as well as many small and medium-sized companies, are all major recruiters of UConn Engineering graduates.

But, he said, the demand is so high for these highly-skilled grads, there still aren’t enough of them. He asked me why we couldn’t just double the number of Engineering graduates UConn produces each year.

I told him we could. But we would need to hire scores of new faculty and staff to teach and support all those new students, and dramatically increase our financial aid budget to recruit more of the best. And that would require financial resources we simply don’t have right now.

The equation is straightforward: more faculty and staff allows us to recruit and enroll even more students. That means more highly-skilled graduates, most of whom go on to work for Connecticut employers and live in Connecticut’s communities. They are the citizens and taxpayers every state in America wants to attract.

It’s true that UConn is today one of the best public universities in the United States, thanks to investments by the state supported on a bipartisan basis. What UConn’s dramatic rise tells us is that, with the right resources, its potential is really unlimited. And more important than any ranking is maximizing the return on the state’s investment.

Diminishing investment means diminishing returns. A degree is on resumes for a lifetime and it loses value if a university’s academic reputation suffers both for the alum who earned it and potential employers.

At the moment we are desperate to avoid leaving an era of excellence behind and entering into a period of decline. That would be a terrible waste, because we can do so much more.

Thank you again for your support for UConn over many years and for listening to us today.

I’ll now ask our CFO, Scott Jordan, to discuss a few key points regarding the budget.
Scott Jordan, Chief Financial Officer

Thank you, President Herbst. Good morning. I will share just a few key points with you:

In FY19, the state block grant and associated fringe will fund 24.1% of UConn’s operating budget for Storrs and the regional campuses.

As President Herbst noted, we will spend 100% of it on personnel, which is longstanding practice.

It will pay for about 47% of our permanent and continuing work force.

The remainder of our workforce – and the rest of our operating budget – is funded primarily through tuition, fees, and external grants.

We will increase tuition by 5.9% in FY19. That will generate $19 million in additional revenue, which helps to mitigate the $57 million in reductions to our appropriation that were adopted in the biennial budget and an additional $9 million in cuts proposed by the Governor, for the Storrs and regional campuses, including fringe, for FY19.

Escalating fringe benefit costs driven, in part, by the unfunded pension liability continue to be a major budget driver for the university, as is the case with the state.

In FY11, UConn’s share of fringe costs were about $92 million. In FY19, fringe costs now account for more than $262 million of our total budget at UConn and UConn Health, with much of that increase coming in just the last few years. That is an increase of 185%.

As you know, the comptroller determines fringe rates. The cost of fringe is without question crowding out other priorities, including academic priorities.

The University has reduced spending by nearly $30 million through a program we adopted known as “SpendSmart.” We hope this will continue to generate savings.

Much of UConn is already centralized and consolidated because we are one institution. Our admissions, financial aid, bursar, and registrations processes were centralized long ago. We are currently implementing a program called “One UConn” that is combining and streamlining certain administrative functions between UConn and UConn Health that will also generate savings over time.

In response to reductions to our appropriation in recent years, we have implemented the cost savings I just described, increased tuition in each of the last seven years under two different tuition plans, cut the budgets of virtually every unit on campus – including academic departments – delayed or cancelled construction projects, restricted hiring, closed our Torrington campus, reduced our workforce and abandoned plans for continued enrollment growth because we will not be able to hire the faculty and staff needed to accommodate further growth at this time.

Thank you again for your time. We would be happy to answer any questions that you have.

UConn

Who We Are

We are UConn Nation

One team, achieving greatness together!

Mission: Teaching Research Service Outreach

- Over 32,000 Students and ~10,000 faculty & staff at all campuses
- UConn Storrs & Regionals: $1.3 Billion Operating Budget
- UConn Health: $1.0 Billion Operating Budget
- 14 schools & colleges offering 7 Undergrad (113 majors), 17 Grad & professional degrees
- 4,318 acres including 101 Residential Bldgs & Dining Halls; Police, Fire, & Utilities facilities
- Storrs Avery Point Hartford Stamford Waterbury Farmington
UConn Impact on Connecticut Economy

- 76% of graduates who attended high school in CT, who are employed, continue to work in the state of Connecticut.

- 27% of graduates who did not attend high school in CT, who are employed, have stayed and are working in the state.

Outstanding Academic Quality

UConn has continued to improve and move up in the US News and World Report rankings.

- $1.3 billion Operating Budget + $250 million Capital Budget annually.
- Over 31,500 students supported by approximately 4,800 faculty & staff.
- Top 20 Public National University (18th) in U.S. News and World Report.
- Nearly 37,000 undergraduate applicants for about 5,300 seats in 2017.
- Undergrad degrees in STEM have increased by 12% since FY13.
- 135,000+ alumni living in Connecticut.

Profile of Fall 2017 incoming Freshmen is remarkable

- Nearly 37,000 freshmen applicants for the Fall of 2017, a record number.
  - From all 50 states, DC, Puerto Rico and 99 countries.

- 5,292 freshmen welcomed at all campuses - including 3,683 at Storrs Campus.
  - 161 valedictorians & salutatorians (81 vals and 80 sals).

- 73% freshmen across all campuses are CT residents, up from 72% last year.
  - Residency mix across all campuses for all undergraduates is 76% in-state and 24% out-of-state.

- 42% of freshmen across all campuses are from minority groups.

- 162 of CT’s 169 cities and towns are represented.

Freshman application trends continue to rise to nearly 37,000 for about 5,300 seats in 2017.

- Applications at all campuses have increased 241% from Fall 1995 to Fall 2017.

- STEM applicants at the Storrs Campus have increased 27% since Fall 2012.
UConn Student Success

Freshman quality is strong.

- Mean SAT score of Storrs Campus entering freshmen for Fall 2017 is 1294.
- Fall 2017 National High School Mean is 1060 and CT High School Mean is 1041.

UConn Student Success

Freshman retention trends are among the highest.

- Nationally, the total Fall 2015 rate ranks 17th among the 58 Public Research Peer Universities and it is substantially higher than the 83% average for 319 colleges & universities in the national Consortium for Student Retention Data Exchange.
- Fall 2015 minority freshmen retention rate is also substantially higher than the national 81% average.
UConn Student Success

Undergrad enrollment has increased 63% from Fall 1995 to 2017.

<table>

### Tuition and Fees vs Competitors

For Connecticut residents, UConn offers the best value.

For Non-Connecticut residents, UConn is the second highest cost among public flagship institutions.
In-State tuition and fee rates at peer public flagship institutions.

- Pennsylvania State University: $18,436
- University of Vermont: $17,740
- University of Virginia: $16,346
- University of Massachusetts: $15,596
- UConn: $14,880
- Rutgers University: $14,660
- University of Delaware: $13,160
- University of Maryland: $10,399
- Stony Brook University: $9,357
- University of North Carolina: $9,005

Tuition and Fees vs Competitors

UConn

Next Generation Connecticut
Next Generation Connecticut Overview

Thanks to the strong support from the State, UConn continues the transformation of modernizing, rehabilitating and expanding the physical plant of the University through the NextGenCT initiative.

- Approved in 2013, NextGenCT is an ambitious plan (FY15-FY27) to improve UConn’s STEM capabilities. Specifically, the initiative is designed to:
  - Build STEM facilities including classrooms, equipment and laboratories.
  - Upgrade aging infrastructure to accommodate faculty and students.
  - Hire new faculty & enroll more talented undergraduate students primarily in STEM areas (dependent on new State operating funds).
  - Increase research productivity & innovation.

- Includes capital and operating components:
  - Capital Budget $1.5B Approved
  - Operating Budget $137M Increase requested in State Appropriation

NextGenCT Progress - Student Growth

Since FY13, total undergraduate enrollment has increased by 1,544 students or 7% despite NextGenCT operating fund shortages – growth at Storrs is more than the planned amount.

- Fall of 2017 enrollment is 23,845, up 215 from the prior year.
- Storrs undergraduate STEM enrollment increased by 31% since FY13.
  - 3,111 of the Storrs STEM students are in engineering which has increased by 57%.

</tbody>
</table>

NextGenCT Progress - Student Growth

Storrs Engineering undergraduate enrollment increased from 1,978 in FY13 to 3,111 in FY18 or 57%.

Why do we need more engineering students?
- Expected workforce growth over next decade in Connecticut:
  - Pratt & Whitney (PW) will hire 8,000 new employees.
  - Lockheed Martin-Sikorsky (LM-S) will grow by 8,000.
  - Electric Boat (EB) will increase its workforce by 4,000.
  - At least 5,000 additional engineers will be needed by these 3 companies alone (based on assumption that 20% of workforce will be engineers).
  - There are at least 200 supply companies to PW, LM-S & EB that will need to significantly ramp up production.
- UConn provides majority of employees for these companies – we have a capacity problem in catching up with demand – resources are needed to maintain and increase our graduates.

<td>Estimated Fringe Benefits:</td>
<td>$ (49,600,000)</td>
<td></td>
<td></td>
<td></td>
<td>$ (127,473,301)</td>
</tr>
</tbody>
</table>

For FY19, under the Governor’s proposal, UConn would receive $190.6M in appropriation + $135.6M estimated in fringe reimbursement totaling $326.2M.

The State appropriation funds 24% of UConn’s budget; 100% of these funds are used to pay employee salaries; it covers 47% of UConn employees. The State reimburses UConn for fringe benefit costs incurred by the University for those employees whose salaries are paid for using the State appropriation (i.e. 47% of UConn employees).

### State Budget Cuts

The Governor’s FY19 budget represents an additional $5.5M appropriation cut for UConn Storrs and Regional Campuses, bringing the total reduction in FY18 and FY19 to $78M ($127M w/fringe) when compared to FY17 State funding.
The State Comptroller develops the fringe benefit rates and UConn is charged those rates for each employee.

</tbody>
</table>

*Rates vary according to coverage selected

**Other retirement options are available for some higher education employees (through the Alternate Retirement Plan (ARP)), which is similar to a traditional 401K retirement plan. The ARP rate is 14.5%, a much lower rate, mainly because it does not include any unfunded liability.

Almost 50% of our employees are on the SERS plan, with the remainder in ARP, and a few individuals on the Teachers Retirement Plan.

What has UConn done to address cuts?

UConn has sustained $104.4M in mid-year cuts since FY10. The cuts have been addressed in a variety of ways including:

- Closed Torrington Campus
- 100 layoffs at the end of FY16
- Merged UConn and UCH Fire and Police Departments to save $1M in FY18 by reducing overtime, reducing FTE count, consolidating leadership, changes in service delivery, etc.
- Through a program called Spend Smart, over 200 initiatives were implemented by over 37 departments, schools/colleges and units totaling nearly $29M in savings.
- Centralized regional campus leadership, enrollment management, financial controls, HR, procurement, software systems and student services to Storrs.
- Continually identifying expense reductions, revenue enhancements, cost avoidance and operational efficiencies
- Currently reviewing and analyzing further coordination, collaboration and consolidation between UConn and UCH including:
  - Human Resources
  - Procurement
  - Document Production
  - General Counsel
  - Communications
Impact of Cuts to UConn

- UConn has carefully and effectively managed its finances to balance the budget and maintain academic quality in the face of major reductions in State support and rising costs over the last few years. The cuts in the biennium are significant and will impact every aspect of UConn.

- However, the magnitude of the cuts are putting UConn’s US New and World Report ranking of 18th among public research universities in jeopardy.

- Protecting academic excellence, delivering strong student support, providing excellent patient care and supporting the research mission of the University will be a challenge going forward.

- Ongoing and mid-year cuts thwart our ability to forecast and plan effectively. Continual significant cuts reduce the quality of the education UConn is able to offer and reduces the University’s ability to effectively contribute to the State and its economy.

UConn’s FY18 Operating Forecast

With a hiring freeze, cost cutting, new revenue streams and expense avoidance, UConn projects a balanced budget for FY18 despite State cuts.

</tbody>
</table>
UConn’s FY18 Operating Forecast

In December, the Board of Trustees approved a revised balanced budget for FY18. State Support now only comprises 24.7% of our total budget.

**Revenues - $1,324.5M**
- Tuition: 30.1%
- State Support: 14.7%
- Auxiliary Enterprise Revenue: 16.6%
- Research Fund: 7.6%
- Other Revenue: 3.0%

**Expenses - $1,323.4M**
- Energy: 1.6%
- Equipment: 1.7%
- Debt Service/Projects: 3.1%
- Fringe Benefits: 19.0%
- Personal Services: 37.3%
- Student Financial Aid: 13.0%
- Other Expenses: 16.0%

Rising Costs – Salary Expenses

Between FY11 and FY18, mandated salary increases, due to union agreements, cost UConn about $68M or 82% of the total salary growth.

The majority of the growth in FY18 is due to graduate assistant contractual increases and additional police. Per the SEBAC agreement, FY18 includes no faculty/staff salary increases.
Despite increasing enrollment by nearly 10,000 since 1995, the number of administrators has remained relatively constant.

UConn’s Administrative Staff is Lean

In comparison to our peers, our Student to Administrator ratio ranks #1 and our Faculty to Administrator ratio ranks #3.
Cuts to State Support

Since FY10, UConn has sustained $104.4M in reductions* including lost fringe.

</tbody>
</table>

* The combined cut including UConn Health amounts to $163.8M since FY10.
* Per statute, should the State budget be in deficit, the Governor may reduce State agency allotments by not more than 5% unless approved by the General Assembly.

Tuition Revenue

FY17 was the first year that tuition surpassed State support as the largest revenue source. The gap grows significantly in FY18 and FY19.

UConn enrollment growth and increased rates, have resulted in overall tuition revenue increases.

*Since FY10, UConn has sustained $104.4M in reductions to State support, including lost fringe.
Four Year Tuition Plan

FY18 tuition increase will only cover half of the cuts from the budget adopted this past fall.

UConn approved a 4 year tuition plan (FY17-FY20) on December 16, 2015 which will provide certainty and transparency for students and their parents.

Financial Aid

UConn is providing an additional $10.6M in financial aid for FY18.

- In FY17 the University allocated need-based and merit aid to over 11,300 undergraduate students.
- The percentage of need-based financial aid to gross tuition is growing to 18.1% which is greater than last year and over the State’s requirement of 15%.
- Need based financial aid is $69.3M out of the $123.5M University supported total.

*Other funding comes from the private sources such as the Foundation and Endowments.
Financial Challenges

UConn has carefully and effectively managed the budget despite deep cuts to the budget over the last few years. Looking forward, the University is facing troubling financial challenges and asks the State for stable funding.

Some long term financial concerns include:

- SEBAC provides a 5.5% increase in FY20 and FY21, which is equivalent to $31M and $36M respectively.
- Fringe growth is projected to grow at 1.5% annually, or $10M in additional expenses per year.
- SEBAC provides a “no layoff” provision. Approximately 56% of UConn’s costs are personnel.
- Tuition Plan ends in FY20.
UCONN 2000 Capital Program

The State approved a revised bonding schedule in October 2017 which deferred significant funding to future years.

- UConn will continue the transformation of modernizing, rehabilitating and expanding the physical plant of the University.
- 32 year UCONN 2000 capital program totaling $4.3B in State Bonds.
  - Phase I & II: $962M from FY96-05 is complete
  - Phase III: $3.3B from FY05-2027 is underway

The State approved a revised bonding schedule in October 2017 which deferred significant funding to future years.

Capital Summary

While the Bioscience CT program is nearing completion at UConn Health, the NextGenCT program at Storrs & Regional Campuses is well underway.

- FY19 is year 5 of the 13 year NextGenCT program and the core science buildings are in construction now or scheduled for construction in FY19.
- $1.1B of bond funds have yet to be authorized for projects that are already under construction or are in planning/design.

- Since funding for major projects is phased over multiple years, it is critical that the capital funding plan remains in tact to avoid additional costs associated with delaying or shutting down projects in construction.
Capital Projects Completed/Nearing Completion

- Projects completed for fall 2017:
  - Hartford Campus - $140M
  - UCH Academic Building Renovation - $36.1M
  - UCH Main Building Phase 2 - $41M

- Projects to be completed during FY18:
  - Innovation Partnership Building (IPB) - $162.3M
  - Engineering & Science Building - $95M
  - UCH EMR Implementation - $98M
  - Energy Savings Improvements Phase 1 - $31.6M
  - North Eagleville Road Infrastructure Phase 3 - $56M

Major Capital Projects in Construction

Multiple State-funded capital projects are in construction.

- Gant Building Renovations - $190M
  estimated completion - December 2022

- UCH Clinic (C) Building Renovations - $91M
  estimated completion - January 2019

- Fine Arts Renovation & Improvements - $34M
  estimated completion - July 2019

- NW Science Quad Infrastructure Phase 1 - $20M
  (to support STEM Research Science 1)
  estimated completion - August 2018
Long Term Capital Program Challenges

The capital program depends upon the economic health of the State.

- UConn delayed multiple capital projects as a result of the State capital funding deferrals. Starting and then stopping projects will affect UConn’s reputation and bid responses/competitive pricing. Therefore, delaying a project today will equal higher costs in the future.

- As UConn moves forward, it is critical that the capital program focus on the following goals:
  - Protecting the core priorities of the NextGenCT program.
  - Preserving projects currently in construction or scheduled to break ground this year.
  - Protecting funding for critical deferred maintenance and infrastructure projects necessary to ensure continued operation and public safety at our campuses.

- It is important to recognize that many capital needs have been identified which are not fully funded or included in the current capital plan and funding strategies will need to be identified.
University Initiated Pipeline for an Innovation Economy

UConn’s $250M in research generates new discoveries that move through translational stages towards commercialization, investment, new companies, and new jobs for Connecticut.

1. Basic/Applied Research & Discovery (R&D)

- Resource Needs:
  - Investments from external funding sources, eg. industry, federal, state, and philanthropic sources
  - High-tech labs/equipment

2. Transforming R&D into New Technologies & Commercial Opportunities

- Resource Needs:
  - Early proof of concept funding
  - Experienced technology commercialization staff
  - Seed funding

3. Creating New Products, Companies & Jobs

- Resource Needs:
  - Experienced business operations staff
  - Incubator space for growing startups
  - Seed investors and venture capital funding

UConn Research & Innovation:
Economic Driver for CT

Federal and industry grants fund groundbreaking basic and applied research to fuel new discoveries and the development of promising technologies.

FY17 Technology Commercialization Activity:

- 61 invention disclosures received
- 87 U.S. patent applications filed
- 28 patents issued
- 10 licenses & options executed
- $1.7M licensing revenue

Support IP Development  New Venture Development  Incubate Startups

Research & Innovation success leads to technology commercialization, creates new companies, new jobs, and positions Connecticut for economic growth.

Technology Incubation Program (TIP) CY 2017 Data:

- $45.6 M raised in debt & equity funding
- $14.8 M raised in revenue from sales and grants
- 35 companies located at the incubator – largest # in program history
- 91 full-time & 71 part-time jobs
- 88 % of incubator space occupied
- $770,000 in taxes paid
UConn Research & Innovation: Commercialization & Company Creation

What Do We Need to Accelerate Growth?

To build on current strengths, gain momentum and see faster returns, we need:

Dollars
• Proof of concept funds to more quickly and substantially transform ideas into products.

People
• More researchers – to grow UConn’s Research & Innovation pipeline and create student inventors/entrepreneurs.
• More venture development expertise – to generate innovation activities, venture development, etc.

Continued investments to grow UConn’s innovation pipeline drive the growth of CT’s economy.

UConn Research & Innovation: Support & Grow Existing Industries

Types of University-Industry Partnerships:

• Industry Contracts
• Joint Research Grants
• Student Internships
• Scientific/Engineering Support
• Clinical Trials
• Technology Development
• Shared Equipment
• Proof of Concept Resources (money & facilities)
• Partner and Startup Co-location (e.g. Industry Partnership Building)

When UConn’s world-class researchers collaborate with industry, economic growth and competitiveness of CT is increased.
UConn Research & Innovation:
Support & Grow Existing Industries

Innovation Partnership Building (IPB) at the UConn Tech Park

- Targets Manufacturers
- Attracts Large Corporations
- Supports Small and Medium-Sized Enterprises in Supply Chain
- Partner with National Labs

Aligning Industry needs with UConn innovation and expertise.

As part of developing the IPB at the Technology Park, UConn has created centers of excellence & announced partnerships with multiple key industries.

Innovation Partnership Building (IPB)

- Over $80M in industry partnerships to date

- $25M Thermo Fisher Scientific Center of Excellence
- $10M UTC Institute for Advanced Systems Engineering
- $9M Eversource Energy Center
- $7.5M Additive Manufacturing Innovation Center in Partnership with Pratt & Whitney
- $7.5M GE Advanced Technology Initiative
- $7.2M Fraunhofer Center for Energy Innovation
- $6M Comcast Center for Security Innovation
- $2.2M Synchrony Financial Center of Excellence in Cybersecurity
- $2.1M Connecticut Manufacturing Simulation Center
- $2M EDAX-Advanced Cameras & Detectors – Thermo Fisher Scientific Center of Excellence
- $1.5M Quiet Corner Innovation Cluster / Proof of Concept Center
- $1.4M UTC Aerospace Systems Center for Advanced Materials Reverse Engineering Fabrication Inspection & Non-Destructive Evaluation Labs (investment amount not disclosed)
Grant Trails

Grant Trails ([https://granttrails.uconn.edu/CT](https://granttrails.uconn.edu/CT)) interactively shows you where research grants that are awarded to UConn faculty are spent throughout our state.

Federal, state, and corporate research grants support researchers at an institution, they also play an important role in supporting local economies in a manner that often gets overlooked. Grant dollars are used to pay for equipment, reagents, consumables, salaries, etc. that are required for actually carrying out the research.

Note: Grant Trails is an open source project, conceived and built at UConn (with talented undergraduates), and available for any institution wishing to visualize their grant expenditures geographically.
UConn: Critical to Connecticut’s Future

1. UConn keeps great students in Connecticut and brings new people to the state — fighting the “brain drain” and helping to build a key working age population
   - Connecticut residents comprise 76 percent of UConn’s undergraduate student body.
   - Some 76 percent of UConn’s employed in-state graduates are living in Connecticut, while 27 percent of out-of-state grads stay in Connecticut for employment after graduation — people who would not have moved here otherwise.
   - UConn’s undergraduate enrollment has increased by 63 percent in the last 20 years.

2. UConn creates new businesses, jobs, and economic growth, strengthening Connecticut industry
   - More than 24,000 Connecticut jobs, or 1 out of every 90, are generated by UConn.
   - The Technology Incubation Program at UConn (TIP) is one-of-a-kind in Connecticut and has supported more than 90 startup companies, contributing to the creation of more than 2,000 jobs supported and sustained annually by the University. TIP companies have raised over $54 million in debt and equity, exceeding the $45.3 million raised in 2016 and $19.2 million in 2015. Company funding included grants, debt, equity, and revenues.
   - Industry leaders including Pratt & Whitney, Comcast, Eversource, UTC, GE, and many more have invested nearly $100 million in UConn in areas such as materials science, advanced manufacturing, big data, computer security, and other fields. Companies heavily recruit student talent on our campuses for both internships and full-time jobs to support their growth.
   - More than 500 U.S. patents have been granted based on UConn innovations, with 28 issued last year alone.

3. UConn prepares students for high-quality jobs
   - Storrs Engineering undergraduate enrollment has increased from 1,978 in FY13 to 3,111 in FY18 or by 1,133 (a 57% increase).
   - With the Bioscience CT initiative, enrollment at UConn’s School of Medicine and School of Dental Medicine is also growing, to ensure a stable source of future medical professionals in our state and access to quality health care for our residents.

4. UConn innovates and finds solutions to major health and societal problems
   - UConn was awarded nearly $681 million in external sponsored programs funding in the last three years.
   - UConn and UConn Health researchers innovate and find solutions to major public health challenges, including cancer, heart disease, stroke, and obesity, as well as major public policy challenges, such as the achievement gap in schools, coastal flooding, energy, cybersecurity, environmental sustainability, infrastructure safety, and more.

5. UConn improves and strengthens Connecticut cities and towns
   - UConn opened a new Hartford campus in 2017 that will transform the capital city’s downtown.
   - UConn has vibrant locations in Groton, Waterbury, and Stamford with thousands of students, faculty, and staff generating millions in economic activity.

Our highest-ever ranking in U.S News & World Report

2017-2018
THE UNIVERSITY
- Founded 1881
- Main Campus: Storrs
- 4 Regional Campuses: Avery Point, Hartford, Stamford, Waterbury
- School of Law and Graduate Business Learning Center: Hartford
- School of Social Work: Hartford
- UConn Health: Farmington
  (Schools of Medicine & Dental Medicine, graduate programs, medical & dental clinics, and UConn John Dempsey Hospital)
- Land Grant & Sea Grant college, Space Grant Consortium institution
- Storrs & Regionals = 4,109 acres; UConn Health = 209 acres

INITIATIVES
UConn 2000 – As of July 2017:
- $3.6 billion in bonds have been authorized
- $3.4 billion in construction-related contracts issued from all fund sources – 64% of funds to Connecticut contractors, 21% to set-aside contractors
- In excess of 4 million square feet of new space added, as well as a significant amount of renovated space
- Bond Credit Ratings by Fitch, Moody’s, and Standard & Poor’s remain consistently strong

Next Generation Connecticut
- Next Generation Connecticut: $1.5 billion capital investment over 10 years includes construction, renovations, infrastructure, and equipment

Bioscience Connecticut
- Bioscience Connecticut: $864 million investment in genomics and personalized medicine
